

Always Available. Always Affordable. The Strength and Engineering You Can Depend on. Champion Fiberglass Conduit.

MORE REASONS TO SWITCH TO CHAMPION FIBERGLASS CONDUIT

- Light weight, resulting in lower labor costs, e.g.
 - 4" fiberglass weighs 0.8 lbs per ft vs. 10 lbs per ft. for steel
 - 4" fiberglass weighs 0.8 lbs per ft vs. 2.3 lbs per ft for PVC SCH 40.
- Has superior corrosion resistance vs. other conduit systems.
- Does not sag at high temperatures or crack at low temperatures.
- Does not nick or scratch during the construction process, causing premature deterioration to a conduit system's longevity.
- Requires no touch-up or repairs after installation.

Champion Fiberglass offers a complete line of fittings and conduit bodies plus fiberglass support systems.

Contact your Champion Fiberglass representative to discuss your next purchase.

You won't regret your decision.
