

## **Connexion Holding Certified Fall Protection Competent Person Training**

*Interactive Course to be Held March 9th-10th: Focuses on Construction Sites*

Chicago, IL, February 19, 2016 --([PR.com](http://PR.com))-- Construction sites can be dangerous - and professional training in the proper use of equipment, interpreting OSHA's directives and knowledge of fall protection regulations are vital for a safe working environment.

Dan Ward, who has trained over 10,000 end users and a consultant for Hollywood and Broadway productions, is a master of safety and fall protection and the teacher for the 2-day certification course.

“When things go wrong on a construction site, it can turn ugly very quickly,” explained Dan Ward. “Having a trained competent person on site who is able to ensure that critical safety standards are being met can quite literally be the difference between life and death—and this Certification delivers the training needed to do so.”

Through interactive demonstrations and hands on training, those taking the course can expect an active approach to safety in the workplace, showing how to apply the principles of fall protection to workers in everyday situations.

The Certification, which typically costs \$1500, is being offered by Connexion for just \$300. To find out more about the training and register for the training, visit <http://www.connexiones.com/cpt/> today.
