Greetings All:

As we all try and continue pushing forward with normal business operations during these unprecedented times, I wanted to reach out to let you know that we are still processing and shipping all orders received.

All of our 3PL warehouse locations (CA, TX and NJ) are still operating, despite recent "Shelter in Place" orders in CA and the surrounding areas of NJ. We have plenty of stock for GC, ILP and we can manufacture a large majority of ILP products at our FL plant.

However, as the effects of COVID-19 start to impact your normal daily capabilities we want to make sure that our customers will be able to receive our material, prior to shipping. To help monitor this, our team will be reaching out 3 days in advance of shipping your order to ensure someone will be able to receive it.

If we do not receive a response prior to shipment, we'll assume the order is ok to ship so as not to hold up any orders while trying to take this extra precaution. If no one is available to receive the material and we were not notified prior to shipment, all Freight Allowed orders will be charged the full freight amount.

If there are any orders presently in house that should be put on hold, please notify your sales or customer support contact immediately.

Thank you for your support during this difficult time. We look forward to continuing to provide you with the very best in products and service.

Sincerely,

Subscribe
