

To our valued customers,

Gripple is a brand that prides itself on innovation, quality, and service. As the leader in suspension solutions for construction, wire joiners for fences and vineyards, braces for solar panels, and anchors for erosion control, we strive to manufacture to the highest standards.

The recent pandemic with COVID-19 has been a strain on the nation and a test for all of us. But despite all of that, we have adapted. And I am very pleased to say that, as an American manufacturer, we are still open for business.

Since a large number of our products are used in construction to drive installation efficiency on essential and critical sites including hospitals, data centers, and airports, it is clear that we need to be here for our customers. Therefore, through this challenging time, we will continue to be operational—fulfilling orders, responding to inquiries, and continuing to manufacture product proudly here in the United States as well as in the United Kingdom.

On behalf of all of the employee owners at Gripple, we wish you safety and health through this strange time in world history. As always, feel free to contact us or your Gripple Territory Manager with any questions.
