

CASE STUDY

Client Name:	Apple Chevrolet
Market Vertical:	Automobile Dealership
Square Footage:	Approx. 211,742
Annual kWh Savings:	4,717,058

Project Summary:

Apple Chevrolet was interested in upgrading their outdoor lighting, illuminating the darker areas of their lot, while improving both their efficiency and light quality. Connexion was hired to assist Apple in redesigning the lighting layout for their lot and exterior building.

Connexion worked with Crosstown Electric to upgrade Apple's existing interior showroom, exterior building and lot lighting. The goal was to significantly improve the quality of light while reducing their connected load. All of this was achieved in compliance with new lighting ordinances. Apple is projected to see an annual savings of 78% and receive an annual return of 64% for their indoor showroom and exterior lighting.

We provide complete turnkey services that ensure your project moves seamlessly from concept to completion to measurement and verification.

Initial Assessment:
Objectives & Needs
