

# CASE STUDY

Client Name:	St. Anastasia Parish
Market Vertical:	House of Worship
Square Footage:	15,500
Annual kWh Savings:	7,300

## Project Summary:

St. Anastasia Parish wanted to update the lighting in the church to achieve energy savings as well as obtain better lighting in the space. Due to the extremely high ceilings in the church, St. Anastasia was having difficulty getting the space bright enough for parishers to be able to see and read.

Connexion updated the space using a variety of LED technologies from the existing metal halide and incandescent light sources. The LED upgrades significantly brightened the space as well as extended the life of the fixtures from 1,000-20,000 hours to 60,000 to 100,000 hours.

Before

## Client Testimonial

"When Connexion was asked to come to our parish, we had two primary concerns: to reduce the lighting costs of the parish, and to brighten up the church's interior. We found the Connexion representatives to be friendly, knowledgeable, and interested in our church. They acted at all times in a professional manner, and our concerns became theirs. They had answers for most of our questions, and those they could not answer were replied to in a timely manner by either phone or email. Our lighting costs have decreased, and the sanctuary of the our church is brighter. We continue to work with Connexion, and we are looking forward to starting a lighting program for the parish school."

-Richard Roberts, Chairmen/Building and Grounds

We provide complete turnkey services that ensure your project moves seamlessly from concept to completion to measurement and verification.

Initial Assessment:  
Objectives & Needs
