

# CASE STUDY

Client Name:	Three J's Industries
Market Vertical:	Industrial Warehouse
Square Footage:	125,000
Annual kWh Savings:	60,199

## Project Summary:

Three J's facilities include a factory space, offices, and various support rooms, all with unique types of lighting. In general, the building contained inefficient T12 fluorescent and High Intensity Discharge (HID) technology.

Connexion installed energy efficient T8 fluorescent technology to provide high quality light throughout the facility. Controlling the office and factory spaces with occupancy sensors further reduced the energy usage of Three J's lighting. Overall, Three J's significant reduced their annual energy usage by more than 60,000 kilowatt-hours.

After

## Client Testimonial

"Utilizing the new lighting from Connexion increased our production and at the same time improved our quality. As an electroplating company who specializes in a wide-array of colored chromates, the new lighting helps us to produce more vibrant colors. Our customers are delighted with our electroplating." -Joanne Marozza, Three J's Industries, Inc.

We provide complete turnkey services that ensure your project moves seamlessly from concept to completion to measurement and verification.
