

Chicago-Based Connexion Announces the Release of Their 2014-15 Midwest Regional Energy Reduction Incentive Quick Guide Publication

Connexion's popular energy incentive quick guide is back and includes additional pages of incentive programs, product specifications and key building code resources.

Buffalo Grove, IL ([PRWEB](#)) July 30, 2014 -- Connexion, a leading provider of electrical and energy solutions to Midwest area businesses, has announced the release of their expanded 2014-15 edition "Energy Incentive Quick Guide".

"We're excited to once again make available our popular Energy Incentive Quick Guide. This year's expanded guide includes key building code resources as well as effectively summarizing the energy reduction incentives available through ComEd, Nicor Gas and the Illinois Department of Commerce and Economic Opportunity, in one easy to navigate publication," commented Daniel Dobski, Connexion's Director of Marketing.

In the Midwest, the energy incentive landscape continues to evolve with the inclusion of new LED lighting measures, new control/sensor requirements, additional HVAC/Refrigeration incentives and expanded standard/custom programs jointly offered through the DCEO, Nicor Gas and ComEd. Connexion's Energy Incentive Quick Guide was created to provide a building owner or chief sustainability officer a quick means to finding the wealth of available energy conservation measures and incentives beyond the basic T12 to T8 lighting retrofit conversions.

New to this year's 50 page publication:

- Expanded listing of incentives/ specifications from ComEd, DCEO & Nicor
- Hyperlinked page index for quicker navigation
- Sensor knowledgebase with applicable building codes and standards
- ASHRAE 90.1-2010 VS. ASHRAE 90.1-2007 chart
- Hyperlinked DSIRE listing of Illinois energy rebates and codes

Connexion, a Trade Ally with ComEd, Nicor Gas and the Illinois DCEO, employs an energy team whose members each specialize in a particular technology and vertical market within the field of energy reduction. These technologies include: lighting systems, control and building automation, electric vehicle charging, engineered clean energy solutions and combined heat and power systems. Included within their vertical market expertise are healthcare and educational facilities, industrial businesses, data centers, property management firms and dedicated solutions for small businesses.

The Energy Incentive Quick Guide is one of several guides available for free download or by mail. Other guides include their T12 Upgrade Guide and their EISA Lamp Availability Guide.

About Connexion:

Connexion, headquartered in Buffalo Grove, IL is a privately held, independent provider of electrical and energy business solutions. Their experienced team of energy and service consultants' goal is to provide strong return on investment and sustainable solutions through the implementation of energy efficient technologies.
